To John Donovan,

20th October 2008.

Faxphone No 01206 851679.

From Gerald James.

Dear Mr. Donovan,

Thank you for your faxed
letter of 3rd October 2008.

Please note I can only reflect what
happened from my point of view
and the extent of my knowledge
both at the time and since. I

cannot lead to any conclusions.

My main concern was the MOD
and not Shell. It is clear Shell,

B.P, British Aerospace, Rolls Royce
and other leading companies like them

12

2)

EMI, Lucas Aerospace etc were and are vehicles for covert Government policy run by unaccountable people.

It is also clear the Bank of England, DTI, FCO Cabinet Office etc are privy to such operations.

As far as Eastby is concerned that is where some of the container loads of arms/equipment were shipped to the Middle East via out site at Sandwich (Richborough). They were shipped by the MOD not shells of gold and of an unsecured. I am not aware of any other MOD sites in that area i.e. Reading/Eastby except Broughfield (Royal Ordnance)

13

3)

and Atomic Weapons Research Establishment
Aldermaston. I have discussed

with Kim Gold and he says
the latter two plants are some
10 miles or so from Easing.

I have no concerns with Shell
except I know it is like BP

and always has been a vehicle

for Government. The financing of

At Yamama was done using

Shell and BP and accounts on

the Bank of England as described

in my book arranged by Peter

Levene and Sir John Gurner.

14

4)

If Easley was actually armed by Shell as far as I am concerned it was the MOD who dealt with us as I understood they stored weapons and ammunition at Easley until the time of the fire. There were records of these movements which were stolen with many other documents by MOD police in 1700 to compile raids on various Astra premises. We had two MOD officials on site handling the movements (see my book). The person who undoubtedly knows the full story is Gordon Forley who

5)

for whatever reason has failed
to come clean no doubt because
he felt it would damage any
deal or outcome he would obtain
with the MOD in their complete
prosecution ^{of him} by MOD Police.

What was actually shipped I
do not know but I believe Farby
stored conventional ammunition and
tactical nuclear weapons like shells
and possibly missiles. Farby
could confirm this I only know
what I have been told by reliable
sources the principal of whom like
Linnel Jones of RO are now degraded
~~Highly~~ ~~Hakbygt~~ is connected to the CIA

16

6)

The secret policies, offshore companies,

Benles like Midland enabled a

lot of money and weapons to be

laundered and there is no doubt

politicians and senior civil servants

prospered. There is evidence

that our company alone laundered

hundreds of millions of pounds,

through parallel bank accounts and

the fraudulent use of our netpages.

All done without the knowledge of

most directors who were only

aware of actual operations with

Iran and Iraq, officially sanctioned

by MOD, FCO, DTI, Colonial Office

MIS, M16 etc.

7)

I have struggled to expose these matters for years and have been very badly let down by several people I have helped considerably.

In the end they are bought off or are offered good and profitable employment or do private deals.

The current bank crisis will help to blow away a lot of interest in what was one of the biggest frauds in the British taxpayer.

As long term vehicles for such major clandestine operations companies like Shell will be afforded huge protection.

Please read the outcome of my Freedom of Information Tribunal case

18

8)

25 September 2007 re Information Commission,
DTI, Colindale office, FCO, MDD
Appeal No EA/2006/003 - 2007/0007
on the Tribunal website.

You will see how they admit
I was right but fail to do
anything.

The law is meaningless as certain
people and institutions are above
the law and the media can be
bought or threatened.

Yours sincerely,

Gerard James
(G R James)
